

Conklin NOZAC

REG. U.S. PAT. OFF.
SATISFACTION GUARANTEED

Reveals the Actual WORD CAPACITY of your pen

With this latest improvement, confined solely to Conklin pens it is possible always to determine the word capacity of the pen and thus avoid the annoyance of suddenly finding the ink supply exhausted. Each of these marvelous new Conklins is equipped with a transparent section containing engraved numerals which form a scale by which the actual presence of ink can be seen and the word capacity established.

By the use of this pen writers can ascertain the actual number of words written without counting them and this is done by merely looking at the gauge. Refilling these pens is easy, sure and speedy—

a positive mechanical action of a new device winding like a watch takes in the ink and being visible, the supply can always be maintained to assure uninterrupted writing service.
